LED Display and Lighting Catalog for Vendors

About Us

At 5 Star LED we build displays that bring you profits. As a manufacturer and wholesaler we fully understand your needs as a distributor. We recognize that a solid product at an affordable price is critical to your success, and we work hard to make this possible.

5 Star LED is a leading manufacturer and distributor of LED displays. For nearly 15 years we have specialized in fabricating all types of digital signage. Our team is highly skilled in crafting custom displays with unique configurations.

At 5 Star LED we pride ourselves in providing timely and accurate products at the best possible prices. Our longevity in the ever changing sign industry is testimony of our craftsmanship and customer service. We are dedicated to providing you with the tools and support needed for your success.

The foundation of our business relies on our continued partnership with sign professionals across the nation. We look forward to working with you on your next project.

How can we help you?

5 Star LED offers a variety of services to sign companies, contractors and architects. We participate in projects of various sizes and always welcome new inquiries.

Fabrication

Our products are built in the USA and this allows us to custom fabricate based on your needs. Our in-house production also guarantees a lead time of 1-2 weeks while competitors quote 1-2 months.
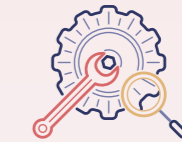

Diagnosis & Repair

We specialize in difficult LED repairs which other companies are reluctant to tackle. Our team consists of seasoned technicians who are capable of diagnosing and repairing various sign issues.

Consultation

Our experts are available for consultation. We provide architects with guidelines and recommendations on LED solutions that are suitable for each specific project.

Materials

We offer high quality materials that have been tested and used by our own team. Our materials include a variety of LED products and other sign substrates.

Company Profile // **Our Products**
5 STAR LED
Manufacturer & Distributor of LED Signage

Signs that make a statement

We work together with our clients to offer retail customers a variety of sign solutions that are eye-catching, economical and effective.

Outdoor LED screens

Outdoor LED screens are a valuable advertising tool. They can be updated at any time and are capable of withstanding harsh outdoor conditions throughout all four seasons.

Outdoor Combo Ligthboxes

Establishing an identity is critical for your business. Outdoor combination lightboxes are a great way of branding your business while promoting your products and services.

Indoor UHD LED Screens

Indoor UHD LED screens are ultra high definition systems capable of delivering crisp and sharp video quality. They are suitable for interior and window use.

Energy efficient signs and lighting

LED usage has increased exponentially in all types of commercial lighting, including signage. At 5 Star LED we use high power LED lights to maximize the brightness and longevity of our signs.

Panel lights

Panel lights are great lighting options for retail and office spaces. They can last up to 50,000 hours and save up to 80% in energy consumption.

Tube lights

Tube lights are increasingly being used for signage and interior lighting. They are energy efficient and ideal replacements for fluorescent bulbs.

LED Channel modules

Led channel modules have become the dominant choice of lighting for sign makers. They are energy efficient and guarantee that your channel letters will be noticed.

5 STAR LED
Manufacturer & Distributor of LED Signage

Our partners

For well over a decade the goals and values which drive 5 Star LED have not changed. Many of our valued vendors have trusted us since the inception of our company. Our ability to maintain these relationships can be attributed to our emphasis on providing our vendors with reliable products and support.

Economical cost

More than a decade in this industry has given us the experience necessary to streamline our production and keep costs low, while maintaining a high standard of quality. Our efficient sales and production processes allows us to offer our vendors the most competitive pricing on today's market.

Quality products

At 5 Star LED we understand that high quality products are essential to keeping your customers satisfied. Our process begins with sourcing top tier parts. Every individual component is tested prior to being used in our displays. This ensures that your LED screen can endure all types of weather for years to come.

Reliable service

We understand your time is valuable. Our quotations are immediate and all parts needed for repairs are shipped within 2-3 days.. All replacement parts are pre-configured to work seamlessly with your existing sign. We are very conscious of your time and do our best to ensure that any repairs are solved immediately.

Financing

LED displays are advertising machines that all business owners benefit from. Numerous studies have shown that LED screens pay for themselves. Business owners notice an immediate increase in sales and customer awareness after installing an LED display. However, we understand that an LED screen is an investment. If finances are a concern we highly recommend taking advantage of several finance programs which allow you to use increased revenues to pay for the screen.

Throughout the years we have formed great partnerships with several companies that offer flexible programs at great rates. **By financing LED signage you can avoid upfront costs and pay on a monthly basis without tying up your cash flow.** This allows new and established business owners to direct their cash into other projects and necessities. Feel free to contact us and one of our experienced sales managers will help you obtain the best possible deals and rates to finance your LED screen.

5 STAR LED
Manufacturer & Distributor of LED Signage

Graphics & Animations

Gone are the days of monochrome and tricolor signs, at 5 Star LED we offer full color capability on all of our displays. With full color comes an opportunity to design an endless variety of graphics, animations and videos. Creating eye-catching content is absolutely critical to maximizing the use of your LED display. In order to design the best possible advertisements it is important to understand the capabilities of your LED display.

Common mistakes often involve choosing photos of the wrong proportion or size. Many advertisements also contain text that is too small to read and too much to comprehend. We also observe that many LED screens are not utilized to their full potential because the user is unsure of what type of images their sign can display. All of our screens can display images, but the clarity of the graphics vary depending on the resolution of your display.

10MM

Content Creation

At 5 Star LED we focus on providing you the best possible LED screen, and we have partnered with media creators who can provide stellar images customized to the specifications of your LED screen. Both small and large businesses are able to take advantage of professionally created content at reasonable prices.
